

UNDERWEAR

THE IRREPLACEABLES

The products of the SIXS Underwear line are suitable for all sports, all year round. Perfect in all circumstances where physical activity is carried out, all the garments of this range have to be **worn in direct contact with the skin, underneath the usual sports clothing.**

Owing to their incredible thermoregulation and breathability characteristics, the SIXS garments always

keep the skin dry because they eliminate moisture and the consequent feeling of dampness. This is why underwear is no longer considered an *optional* during sports activity. **By avoiding sudden chills** (due to perspiration or damp fabric in contact with the skin) **comfort will always be guaranteed while considerably reducing muscle injuries.**

THE COLOR REVOLUTION... CONTINUES!

Following the amazing innovation of 2015 (the year the first colored products were launched), we have not quit allowing room for your wish to be unique. In addition to the four colors already presented (Yellow Fluo, Green Fluo, Orange Fluo and Pink Fluo), we are now introducing another 4 colors: **Red, Light Blue, Dark Red and Dark Green.**

WIND PROTECTION ACCORDING TO SIXS

Starting from the need to provide increased protection from air in the front zone of the body, we have inserted the exclusive **AIR SHIELD** system in several products. It is an extremely effective windproof protection without membrane to maintain a very high degree of sweat wicking, in this way preventing the classic "greenhouse effect".

TECHNOLOGIES

- Grid-tech

The SIXS mesh sleeveless jersey is the product for those who need minimal, fresh and lightweight clothing. Thanks to GRID-TECH technology, the mesh lies between the skin and the clothing on top to prevent annoying chafing and create cushions of fresh air that reduce the sensation of the skin "suffocating" under the garment. The polyamide fiber with its extremely low specific weight is able to absorb the skin's moisture to leave it fresh and dry.

MATERIALS

Breezy Net®

Ultralight and extremely elastic polypropylene mesh. High absorption of body moisture.
